

August 11, 1948.

Dr. Albert Levan,
Cytogenetic Laboratory,
Swedish Seed Association,
Svalof, Sweden.

Dear Dr. Levan,

I have followed your extremely interesting work on the modification of normal mitotic behavior with various chemicals for some years now, with considerable enthusiasm. I would regard it a great favor, if possible, to be placed on your mailing list for your publications on this subject, past and forthcoming, and in the immediate instance to receive a copy of your recent paper in Hereditas, "Induction of chromosome fragmentation by phenols".

With sincerest respects,

Yours truly,

Joshua Lederberg,
Assistant Professor of Genetics.
